

CASE STUDY

A global newsroom governed as one estate

Global media network, Doha

September 2026 · Version 1.0 · BlueWhale Stack · www.bluewhalestack.com

A Doha-headquartered media network put broadcast, streaming, archive and worldwide bureaus under one governance plane, ran Whale AI on its own models inside the perimeter for archive intelligence and transcription, and decomposed production cost per channel and programme.

A Doha-headquartered media network put broadcast, streaming, archive and worldwide bureaus under one governance plane, ran Whale AI on its own models inside the perimeter for archive intelligence and transcription, and decomposed production cost per channel and programme.

Zero External AI data exposure	Arabic-English Offline archive AI	Per-program Cost visibility
--	---	---------------------------------------

The situation

A Doha-headquartered global media network ran broadcast, streaming, decades of archive and worldwide bureaus across many estates — under sustained, sophisticated cyber threat, and with a professional obligation particular to journalism: newsroom material, sources and unpublished work must never reach external AI services.

What BlueWhale Stack did

One governance plane spanned broadcast, digital, archive and bureau estates, with worldwide bureaus managed as offline-tolerant edge sites under headquarters-grade policy and scanning. Whale AI ran fully inside the perimeter for Arabic-English archive intelligence, transcription and research on the network's own models, while Whalenomics cost visibility decomposed streaming and production cost per channel, platform and programme.

"The newsroom now uses AI for archive search and transcription every day, and every prompt and every document stays on our own systems. Sources and unpublished work have never left the building."

Head of Technology, Global media network, Doha — as reported by the customer

Enterprise Edition

The full platform, BYOC across every estate. Includes All nine capability families, Whale AI — including offline, Cloud Audit & Evidence · Migration Engine. Deployment: SaaS, BYOC, Sovereign.
