

Standard Edition datasheet

Govern your AWS, Azure & GCP estate with Whale AI Spark.

September 2026 · Version 1.0 · BlueWhale Stack · www.bluewhalestack.com

Governance from day one for a single estate — inventory, governed provisioning, Whalenomics essentials, security baseline and observability, basic ITSM and Whale AI Spark. SaaS or BYOC.

Governed cloud for a single estate — the foundation edition for mid-market and single-cloud enterprises running AWS, Azure or GCP. Management & Delivery, Whalenomics essentials, a security baseline with observability, basic ITSM, business connectors and Whale AI Spark — single-tenant, delivered as SaaS or BYOC.

\$24,000 / year Flat, published · 1/3/5-yr terms (2-yr -10%, 3-yr -15%)	SaaS · BYOC Deployment models
Spark (1M tokens / month) Whale AI tier	99.5% Platform SLA

The outcome

Governance from day one — not a retrofit. Includes Management & Delivery, Whalenomics essentials, Security baseline & observability.

What is included

- Cloud inventory & governed provisioning
- Whalenomics essentials — cost visibility and budgets
- Security baseline, compliance & audit reports, bundled observability
- Basic ITSM + CRM / ERP / ITSM connectors
- 3 public clouds (AWS · Azure · GCP) · Whale AI Spark — 1M AI tokens / month

Scale, quotas and support

Dimension	Standard
Tenants	1 (single-tenant)
Cloud accounts (included)	5 accounts
Managed resources (MRU)	1,000 MRU
Users / seats	10 users
Whale AI tier	Spark
AI tokens / month	1M included
Deployment models	SaaS · BYOC
Clouds supported	AWS · Azure · GCP
SLA	99.5%
Support	Business hours · 24×5 optional

Modules in the Standard Edition

Inventory & Discovery A live, unified map of every asset — across every cloud and on-prem. (Generally available)	Cloud Connectors One control plane over six public clouds, plus private, hybrid & edge. (Generally available)
Identity & Access One identity fabric — federate your IdP and auto-provision access everywhere. (Generally available)	Service Catalog Provision approved cloud resources — no consoles. (Generally available)

ITSM Cloud-ops-native incident, change & problem management. (Generally available)	Observe Production APM — logs, metrics, traces & SLOs, bundled. (Generally available)
Whalenomics FinOps — budgets, forecasts, chargeback & continuous optimization. (Whale AI use cases live)	Whale AI A horizontal AI layer across every module — 50+ use cases, able to run fully offline. (Generally available)

A good fit for

- One organisation on AWS, Azure and/or GCP with up to 5 cloud accounts and about 1,000 resources
- Teams that need one inventory, a provisioning catalog and cost visibility before sprawl sets in
- SaaS companies and departmental IT answering their first customer security questionnaires

Look elsewhere if

- Estates with on-prem VMware, Hyper-V or Nutanix — the Edge Agent is Enterprise & up
- Oracle, Alibaba or Huawei Cloud accounts, or more than one tenant
- Migration programmes, continuous audit evidence or IaC generation — those families are Enterprise & up

Licensing and deployment questions

01 What exactly is included at \$24,000 a year?

Inventory & Discovery, Cloud Connectors for AWS, Azure and GCP, Identity & Access, the Service Catalog, basic ITSM, Observe, Whalenomics essentials and Whale AI Spark with 1M tokens a month — for 5 cloud accounts, 1,000 managed resources and 10 users, on SaaS or BYOC.

02 What happens when we outgrow it?

Upgrading to Enterprise is a licence change on the same deployment: the extra clouds, the Edge Agent, the Migration Engine, Cloud Audit & Evidence, WhaleForge and the full Whale AI tiers switch on. Nothing is migrated.

03 Is there a discount for longer terms?

Yes — 10% on a 2-year term and 15% on a 3-year term, on the published price.

Proven before commitment

Every edition starts with the 90-day prototype: a half-day discovery workshop that agrees success criteria with your technology and finance leaders, then the platform on your own estate for 90 days with no licence cost, scored on day 90 before any licensing decision.
