

**BLUEWHALE STACK**

**PARTNER PROGRAM GUIDE**

# **System Implementation Partner**

Design, deploy and support BlueWhale Stack for your end customers.

## OVERVIEW

# What this track is

Implementation Partners do the technical work: discovery, migration planning, configuration, integration with existing tools and infrastructure, and ongoing operational support. You may deliver alongside an LSP or a direct BlueWhale Stack agreement — your value is delivery, not the license itself.

**Ideal for** — Systems integrators, cloud consultancies and MSPs with hands-on delivery and migration teams.

## WHAT'S INCLUDED

# Program benefits

- Technical certification for your engineers, per module and edition you deliver
- Sandbox environment plus implementation playbooks and reference architectures
- Co-delivery with BlueWhale Stack's own delivery team on your first engagements
- Direct escalation path to product & engineering during implementation
- Listed as a certified implementation partner in the marketplace

## THE JOURNEY

# From application to launch

### 01 Apply

Tell us which modules, editions and industries your delivery team wants to certify on.

### 02 Certify your team

Engineers complete technical training and certification per module/edition.

### 03 Get sandbox access

A hands-on environment, plus implementation playbooks and reference architectures.

### 04 Co-deliver your first project

BlueWhale Stack's delivery team shadows or co-leads your first customer rollout.

### 05 Deliver independently

Run implementations solo, backed by an ongoing support and escalation channel.

This guide is for informational purposes only and does not constitute a binding offer. It is superseded by your signed BlueWhale Stack Partner Agreement. Questions — [partners@bluewhalestack.com](mailto:partners@bluewhalestack.com).
