

DATASHEET

Government Edition datasheet

Sovereign / air-gapped Enterprise platform hardened for public sector.

Sovereignty demonstrated by the architecture. September 2026 · Version 1.0 · www.bluewhalestack.com

The Enterprise platform with a mandatory sovereignty layer — air-gapped install, FIPS crypto, always-on PAM, WORM audit log, residency enforcement and accreditation-ready compliance packs.

Full Enterprise platform with a mandatory sovereignty layer: air-gapped install, offline update channel, FIPS-validated crypto, PAM always-on with session recording, MFA mandatory on every role, immutable WORM-backed audit log, data residency enforcement, compliance pack export for FedRAMP/IRAP/StateRAMP-style accreditation. Connects to sovereign cloud environments (AWS GovCloud, Azure Government, Google Distributed Cloud, national sovereign clouds).

Contact sales Enterprise base plus sovereignty layer · 3–5 yr fixed-bid terms · tender & empanelment-ready	Sovereign (on-prem) · Private Gov Cloud · Government Edge Deployment models
in-region Abyss (air-gapped, no call-home) Whale AI tier	Per-contract Platform SLA

The outcome
Sovereignty demonstrated, not asserted. Includes Sovereign Operations, Air-gapped deployment classes, State-audit evidence & segregation.

What is included

- Full Enterprise platform, sovereign/air-gapped deployment
- PAM always-on, MFA mandatory, FIPS-validated crypto
- Immutable audit log (WORM), data residency enforcement
- Compliance pack export (FedRAMP/IRAP/StateRAMP-style accreditation evidence)
- Sovereign cloud connectors: AWS GovCloud, Azure Gov, GDC, national clouds

Scale, quotas and support

Dimension	Government
Tenants	Dedicated silo
Cloud accounts (included)	Per-contract
Managed resources (MRU)	Per-contract
Users / seats	Per-contract
Whale AI tier	Abyss (in-region only)
AI tokens / month	In-region quota
Deployment models	Sovereign · Air-gapped
Clouds supported	Sovereign clouds
SLA	Per-contract
Support	Premium 24×7 (mandatory)

Modules in the Government Edition

Inventory & Discovery A live, unified map of every asset — across every cloud and on-prem. (Generally available)	Cloud Connectors One control plane over six public clouds, plus private, hybrid & edge. (Generally available)
Identity & Access One identity fabric — federate your IdP and auto-provision access everywhere. (Generally available)	Service Catalog Provision approved cloud resources — no consoles. (Generally available)
ITSM Cloud-ops-native incident, change & problem management. (Generally available)	Observe Production APM — logs, metrics, traces & SLOs, bundled. (Generally available)
Whalenomics FinOps — budgets, forecasts, chargeback & continuous optimization. (Whale AI use cases live)	Migration Engine 6R assessment, rehearsed waves & rollback for cloud migration. (Assessment live)
WhaleForge IaC YAML DSL → real Terraform HCL, with live diagrams. (Beta)	Landing Zone Builder Design compliant cloud foundations visually. (Beta)
Cloud Audit & Evidence Controls monitored continuously — the auditor's report generated on demand. (Included in Enterprise & up)	Sovereign Operations In-country deployment, segregation, air-gapped classes and offline-tolerant edge. (Generally available)
Whale AI A horizontal AI layer across every module — 50+ use cases, able to run fully offline. (Generally available)	

A good fit for

- Ministries, agencies and defence estates with air-gap, residency or accreditation mandates
- Central banks and critical-infrastructure operators that must show sovereignty as a property of the architecture
- National and state governments segregating directorates under one central policy

Look elsewhere if

- Public-sector bodies on commercial cloud with no air-gap or accreditation requirement — Enterprise on BYOC or Sovereign usually fits
- Organisations that need Whale AI on hosted models — the Government Edition runs in-region models only

Licensing and deployment questions

01 How is it procured and priced?

Tender- and empanelment-ready on 3–5 year fixed-bid terms, priced as the Enterprise base plus the sovereignty layer, directly or through accredited implementation partners.

02 How do updates reach an air-gapped deployment?

As signed release bundles transferred through your approved process and verified on import. There is no call-home and no forced upgrade on sovereign estates.

03 Which accreditations does it support?

Compliance pack export produces evidence for FedRAMP-, IRAP- and StateRAMP-style accreditation; the platform itself holds ISO/IEC 27001, 27017, 27018, 27701 and ISO 22301 certifications.

Proven before commitment

Every edition starts with the 90-day prototype: a half-day discovery workshop that agrees success criteria with your technology and finance leaders, then the platform on your own estate for 90 days with no licence cost, scored on day 90 before any licensing decision.
