

BLUEWHALE STACK | ENTERPRISE EDITION FOR BFSI

BlueWhale Stack Enterprise Edition for BFSI

Audit-ready multi-cloud for Indian banking — uniform policy, examiner-grade evidence, Whalenomics cost governance and a rehearsable exit plan, across every environment the bank runs.

Inspection-ready, continuously

Evidence generated, not assembled — the audit binder becomes a report parameter.

The exit plan, rehearsable

RBI outsourcing exit strategy as a mapped, drilled migration programme.

AI inside the perimeter

Offline Whale AI — leverage in operations and compliance, no data leaving.

WHERE THE EDITION SITS — INDUSTRIES TO INFRASTRUCTURE

PSU Banks	Private Banks	Small Finance Banks	NBFCs	Insurers	Payments & Fintech
-----------	---------------	---------------------	-------	----------	--------------------

Industry outcomes, consumed through Enterprise Edition for BFSI

Every use case inherits governance, sovereignty and cost control by construction.

BlueWhale Stack — one platform, four editions

THIS EDITION

Unified Cloud Mgmt

Whalenomics • FinOps

Security & Identity

Whale AI

Migration Engine

Multi-Tenancy

Signature capability families — the full portfolio map is on page 2.

Any infrastructure — governed as one estate

Public cloud • private stacks • virtualization • on-premises datacenters and edge.

WHY THIS EDITION

No Indian industry carries a heavier compliance load into the cloud than banking — RBI, CERT-In, DPDP and SEBI within one estate. The Enterprise Edition answers all of it at the platform layer: a control proven once is evidenced identically everywhere, the exit strategy becomes a rehearsable programme, and the CFO signs a cloud number the platform can decompose.

AT A GLANCE

LIST PRICE USD 120,000 / yr • flat	DEPLOYMENT BYOC • Sovereign • SaaS	QUOTAS 100 accounts • 1M resources • 1,000 users	SLA 24x7 • 99.9% • L3 + critical bridge

The BlueWhale Stack Portfolio — 54 Capabilities, One Control Plane

The complete platform, mapped. Gold-highlighted capabilities are licensed and decisive in Enterprise Edition for BFSI; the remainder shows where the platform extends as the estate — or the business model — grows.

⚙️ Management & Delivery Unified Cloud Mgmt Operator Console Service Catalog Landing Zone Builder Extended Connectors Edge Agent	📊 Whalenomics • FinOps Cost Reports Budgets & Forecasts Chargeback / Showback Optimization Advisor Per-Tenant Cost Gov. ■ **Gold** = included and decisive in Enterprise Edition for BFSI • white = available in the wider platform • every edition inherits the shared core.

DEPLOYMENT TOPOLOGIES

BYOC Control plane in the bank's own India tenancy	SOVEREIGN In the bank's datacenter — nothing leaves	SAAS Non-material workloads • in-place path to BYOC
--	---	---

One platform, four editions — capabilities compound

Standard → Enterprise → Telco & Datacenter / Government: each edition inherits everything below it and adds the modules its operating model demands. An upgrade is a licence change, not a migration.

MIGRATION COVERAGE

The Migration Engine assesses, maps dependencies, replicates and cuts over workloads across **AWS • Microsoft Azure • Google Cloud • VMware • Nutanix • Hyper-V** — with decommissioning closing the loop.

Features & benefits

Theme	Feature	What it does	Benefit
COMPLY	Regulatory alignment map	RBI IT Outsourcing & Governance, Cyber Security Framework, payment-data localisation, CERT-In, DPDP, SEBI CSCRF carried at platform layer	Six regimes answered by one architecture — evidenced once
	Audit on demand	Uniform controls monitored continuously; examiner-grade reports generated	Inspection prep collapses from weeks to days
	Residency by construction	BYOC/sovereign deployment; workloads, logs, identity and control plane in-India	Payment-data localisation honoured end to end
CONTROL	Whalenomics for the bank	Budgets, forecasts, chargeback by business unit and product	A cloud bill the CFO can decompose — and sign
	Identity & maker-checker	Enterprise SSO, RBAC, role separation and approval workflows	Least privilege the auditor accepts, with review reports
	SIEM & SOC integration	Findings and activity logs exported, triage-classified	The SOC sees the cloud estate the way it sees everything else
MODERNIZE	Migration Engine	Assessment, dependency mapping, rehearsed waves, cutover, decommissioning	The exit plan — and the datacenter exit — as programmes, not heroics
	Landing Zone Builder	New workloads born inside policy	Compliance stops being a retrofit before every go-live
	Offline Whale AI	AI operations and compliance reporting fully inside the perimeter	The AI conversation without the data-sharing conversation

AT A GLANCE

LIST PRICE USD 120,000 / yr • flat	DEPLOYMENT BYOC • Sovereign • SaaS	QUOTAS 100 accounts • 1M resources • 1,000 users	SLA 24x7 • 99.9% • L3 + critical bridge

Digging Into the Work — Before and After

✓ The RBI inspection, prepared in days

AS IS

- Evidence assembled by hand across consoles
- Controls differ per environment
- Findings on consistency, not intent
- The audit calendar sets the pace of change

TO BE • ON BLUEWHALE STACK

- Uniform policy enforced platform-wide
- Continuous compliance monitoring
- Examiner-grade reports on demand
- The binder becomes a report parameter

Pattern from the field: the same control, evidenced identically in every environment, is the single largest reducer of repeat findings.

∪ The datacenter exit — with the exit plan

AS IS

- Exit strategy is an annexure, never tested
- Dependencies unknown until they break
- Concentration risk flagged by vendor risk

TO BE • ON BLUEWHALE STACK

- Dependency-mapped, rehearsed migration waves
- Annual exit drill — with filed evidence
- Multi-cloud placement answers concentration

Pattern from the field: dependency mapping typically reveals 20–40% more interconnections than the CMDB records — found before cutover, not during it.

GETTING STARTED

Step	What happens	Duration
1 • Discovery workshop	Map the estate, the regulatory posture and the ambition; agree prototype scope.	One week
2 • Working prototype	The offering live on the organization's own environments — full-featured, 90 days, no licence cost.	2–4 weeks to first insight
3 • Evaluation on evidence	Capability scorecard and findings — judged on the organization's own numbers.	Day-90 review
